# REVIEW OF MARKETS FINANCIAL AND COMMERCIAL

Stocks, Money, Exchange, Bon is, Grain, Cotton, Provisions, Etc.

These Are Closing Sales Each Day.

New York, Nov. 12.—The first decisive set-back to the upward course of prices which has been the full swing in the stock market since Wednesday morning last occurred to-day and conservative circles in Wall street breathe easier as a consequence. The headlong pace at which the circulation has proceeded has been the cause of uncashess lest some untoward event should preclitate a violent decine with disastrous results. To-day's late reaction was largely due to manipulation by professional bears, and there were indications that some of the large bull interests were acquiescent in the movement. A prolonged and extensive advance, such as that of the last week, attracts a following of weak speculators, whose liability to fright forced hquidation on a very slight reaction are a menace and an obstruction to the more powerful bull speculators. This latter class sometimes wink at a bear attack in order to shake off this undestrable following. There was an enormous amount of profit taking accomplished following. There was an enormous amount of profit taking accomplished following. There was an enormous amount of profit taking accomplished the course of the day by professione carly hours of the day by professione speculators, who began to feel doubts speculators, who began to feel doubts appeared to be a subject to the first signal of danger that the calmoney rate was the most effection. Skillful speculators have kept a watchful yeem this index of money conditions, to detect the first signal of danger that the borrowing for speculative purposes were overrunning the available resources of the money market. It is not likely that there was any actual pressure upon speculative borrowers to-day, but the effect upon speculative sensitiveness of opinion to this indication and the success of the professional attack upon the market a special pressure upon speculative borrowers to-day, but the effect upon speculative purposes were observed the first signal appearance. #### The Cotton Markets.

The Cotton Markets.

NEW YORK COTTON MARKET.

New York, Nov. 12.—The market for cetton was very excited, very active and decideally higher to-day. The opening prices showed an advance of 12716 points and further advanced 8012 points on generally buillish 'conditions. There were a few intervals of weakness resulting from profit taking and occasional sales on the reaction theory. But as a rule the market was most vigorous, with speculation broadening rapids and including a considerable proportion of buying on investment necount. Covering was an important feature. The great strength of the market was largely due to killing frost in taking by frost in that territory last week had been more serious than at the damage by frost in that territory last week had been more serious than at the time assumed. The Southern markets were generally higher, while accounts from American spinners as well as from foreign spinning centers were also of a buillish character. Cotton goods were reported to be in better shape. The movement of cotton in the South was fairly sustained; a fact, however, quite generally ignored in view of prevailing sentiment. Europe bought freely, the near positions chiefly. Wall street an the South also operated extensively on the long side of the necount. In the afternoon buying was checked by heavy estimated receipts for New Orleans and Houston especially at the lattert for temore. The market closed steady at a net advance of 24623 points.
